

ALMAWAVE: VELVET NOW SUPPORTED IN ORACLE CLOUD INFRASTRUCTURE AI QUICK ACTIONS

Almawave continues to strengthen its collaboration with Oracle

Rome, June 12, 2025 - Almawave (ticker: AIW), part of the Almoviva Group and listed in the Euronext Growth Milan market, today announced that Velvet, its family of generative AI models, is now supported as a default LLM in [Oracle Cloud Infrastructure \(OCI\) Data Science AI Quick Actions](#). OCI Data Science AI Quick Actions is a platform service that enables Oracle customers to easily evaluate and deploy commercial AI foundation models.

With this integration, customers can now easily and efficiently test Velvet to build generative AI solutions into their business processes, benefiting from Velvet's scalability, high availability, and advanced security. The integration also enables Velvet, which is designed in Italy with a strong focus on data sovereignty and regulatory compliance, to reach customers anywhere in the world through Oracle's partner ecosystem.

Today's announcement follows Almawave and Oracle signing a Memorandum of Understanding (MoU) earlier this year on a joint collaboration to develop Velvet-based AI services for customers in Italian vertical industries such as energy, healthcare, manufacturing, public sector, and transportation. As part of the collaboration, Almawave is also using OCI for Velvet training and inference workloads.

"This choice confirms the mutual attention and trust between Oracle and Almawave. We are not stopping here - we are working hard on new trainings that will take us even further in our vision of AI made in Europe. Being included as a default LLM in OCI Data Science AI Quick Actions provides us relevant strategic visibility globally. It is a concrete step toward new business opportunities, including at the international level, which we will be able to pursue jointly with a strategic partner such as Oracle, which has helped make this ambitious milestone possible very quickly. This collaboration further reinforces our vision of an Artificial Intelligence at the service of people and businesses, designed in Europe and able to integrate effectively and efficiently into real-world contexts to generate real impacts" said Valeria Sandei, CEO Almawave.

"We are truly proud - both as Oracle and as Italians - of the significant and rapid progress Almawave is making, also with our support. Thanks to the distinctive features of our OCI AI Infrastructure, which enable the full potential of cloud-enabled artificial intelligence to be realized, their Velvet family will soon be able to deliver increasingly high-performing, scalable, and secure AI models—to the benefit of end customers across Europe" said Andrea Sinopoli, VP and Country Leader Cloud Technology, Oracle Italy.

Almawave profile

Almawave S.p.A. is an Italian company, listed on the Euronext Growth Milan (AIW.MI) market and engaged in the field of Data & Artificial Intelligence. The Group offers proprietary technologies, solutions and services which realize AI and data's potential in the digital evolution of companies and public administrations. It boasts more than 450 domestic and international customers, in sectors including Government, Finance, Energy & Utilities, Tourism and Healthcare, operating directly and through partners.

The Almawave team consists of approx. 440 professionals. The Group uses AI technology labs dedicated to developing products, platforms and vertical solutions targeting various market segments. Almawave's technological asset base, conceived and built as a model of natural experience in the interaction between man and machine, can interpret text and voice in over 40 languages, interacting in multi-channel mode, analyzing data and information with a view to knowledge development and automation to support decisions. Its skill centers also allow the potential of data to be achieved in complex contexts, combining expertise on key market frameworks in areas such as Data Management, Machine Learning, Location Intelligence, and the knowledge of business processes in related vertical sectors.

The Almawave scope, part of the Almaviva Group, includes the companies SisTer, The Data Appeal Company, Mabrian Technologies, Obda Systems, Almawave do Brasil, and Almawave Usa. www.almawave.com
