Valeria Sandei at the 2025 ITIR Summit

The second edition of the ITIR Summit took place in Pavia on January 23rd. Among the keynote speakers was Almawave CEO Valeria Sandei, who explained the need for agile, ethical, and human-centered AI for the improvement of strategic sectors such as healthcare. Its adoption must be responsible, ensuring data control and minimizing bias, while focusing on practical solutions and human expertise to facilitate innovation in Italy.

New Blog post: identifying Fake News with Multimodal Artificial Intelligence

Accessing information has never been easier, quicker, or more convenient, especially online. Unfortunately, this convenience has led to a growing threat: fake news. However, AI is driving the development of faster and more effective solutions for detecting and avoiding the spread of fake news, in particular through multimodal AI, which analyzes text, images, and videos.
