Almawave and Oracle: strategic collaboration for Artificial Intelligence in Italy and Europe

During the Oracle CloudWorld Tour event in Milan, Almawave announced the signing of a Memorandum of Understanding (MoU) with Oracle, marking the start of a collaboration for the development and provision of artificial intelligence services based on Velvet for customers in vertical industries such as energy, healthcare, manufacturing, the public sector, and transportation.

Velvet, the family of multilingual generative AI models developed by Almawave, is now available on Oracle Cloud Infrastructure, making it easier to access and adopt both in Italy and international markets.

Velvet: the new paradigm of AI between ethics and innovation

In this new article, we explored all the key aspects of Velvet, its advantages, and specific use cases. Velvet, Almawave's Made-in-Italy family of LLMs, is designed for companies and public administrations with a focus on reliability, sustainability, and compliance with European regulations. Discover how Velvet combines awareness, lightness, and agility to transform business across various industries.

Euro-Mediterranean Economy Festival 2025: Almawave's CEO and CTO take center stage in the third edition

Valeria Sandei, Almawave's CEO, and Raniero Romagnoli, CTO, participated in the Festival, sharing their experience on AI and its impact on Italy's technological and innovative development. They spoke about the potential of Velvet and how Almawave's technologies integrate into a complex platform leveraging multiple AI capabilities to optimally meet various business needs.

Almaviva and Almwave at the Conference "Artificial Intelligence and Public Transport"

Andrea Mastinu, Sales and Business Development Manager at Almaviva, and Antonio Cerqua, Chief Innovation Officer at Almwave, discussed how AI is transforming the transportation sector, delivering concrete benefits in terms of efficiency and service quality for both businesses and users.

Green AI: how Artificial Intelligence can become more sustainable to help the planet

In this new blog, we explored the role of artificial intelligence in shaping a sustainable future, analyzing the sustainability challenges AI will face. Specifically, we also explained what truly constitutes sustainable AI, highlighting Almawave's ongoing commitment to ensuring maximum sustainability. Finally, we focused on Velvet, an innovative green AI model developed to reduce environmental impact and improve operational efficiency.

Almawave's CEO among the key speakers at Pact4Future 2025

Among the over 80 international speakers, with 3,000 participants in-person and a digital audience exceeding 800,000, Valeria Sandei, Almawave's CEO, participated in the panel "Artificial Intelligence and Corporate Purpose: Leading Responsible Innovation," moderated by Daniele Manca, Deputy Director of Corriere della Sera. Sandei delved into the role of AI in transforming business processes, enhancing customer interactions, and optimizing public services, with a focus on ethics, transparency, and sustainability.
