Valeria Sandei receives the "John McCarthy" Award 2025

From the stage of AI Week, Valeria Sandei, CEO of Almawave, receives the 2025 "John McCarthy" Award: a recognition that celebrates those who have successfully integrated Artificial Intelligence into business models, generating value and innovation.

In her speech, she thanked Oracle for its technological support and recalled John McCarthy as a symbol of human and creative innovation.

Innovation takes center stage at FORUM PA 2025

On May 21 in Rome, Almawave participated in Forum PA 2025 with the seminar “Towards a More Connected Future: Innovative Scenarios of Integration between NDC and PDND in the Interoperability Ecosystem,” featuring discussions with major public institutions such as ISTAT, INAIL, INPS, PagoPA, and the Department for Digital Transformation.

Experts highlighted the central role of semantics in enabling clear, secure, and understandable data exchange—a key element for a more efficient and transparent public administration.

Sister launches Dataportal.AI

Sister, a company of the Almawave Group, has released DataPortal.AI, a new proprietary platform that utilizes generative Artificial Intelligence in disseminating and exploiting structured data.

The new proprietary solution has already been applied to more than 50 projects and is the first on the market to use AI to streamline data publication and improve data research in the public sector, statistical, regional, and industrial sectors.

Franco Martino participates in the Africa CEO Forum 2025

Almaxwave was among the key players at the Africa CEO Forum 2025 in Abidjan, as part of a delegation from Confindustria Assafrica & Mediterraneo. Franco Martino, International Development Director, highlighted the company's contribution in applying AI to strategic sectors such as healthcare, fintech, logistics, and agribusiness. The event provided an opportunity to strengthen partnerships and showcase the potential of AI for Africa's development.

Valeria Sandei on stage at the General States of Innovation

At the General States of Innovation, organized by Il Sole 24 Ore, Valeria Sandei, CEO of Almawave, spoke on the topic of AI governance, emphasizing the importance of a clear and shared European regulatory framework.

She highlighted how the AI Act, along with other regulations, must be translated into effective and equitable practices. For Sandei, the real challenge lies in developing streamlined and functional technologies within a context that promotes healthy competition.

Sister present at the World Utilities Congress 2025

Almaxwave and Sister are taking part in the event in Abu Dhabi alongside EEIC (Ghobash Group), presenting Smart Water Management System. Powered by predictive artificial intelligence, SWMS analyzes water network data to reduce waste, optimize operations, and support planning.
