## New generation of Velvet family multilingual AI for Europe launched

Almageve presents the latest-generation language models in the Velvet family, to strengthen the Large Language Model landscape in Europe and ensure accessible, multilingual AI that is effective and can be adapted to a variety of use cases.

These are the new Velvet 25B – which is optimized for text processing in all of the European Union’s 24 official languages and boasts advanced reasoning capabilities and management of complex environments – and Velvet Speech 2B, a compact, versatile multimodal text-to-voice model that enables dynamic real-time interactions.

ARTIFICIAL  
INTELLIGENCE.  
MADE HUMAN

## **Almaviva Saudi Arabia Business Services, Subsidiary of Almaviva Group, to sign MoU with solution by stc at GITEX Global 2025 in Dubai**

The signing took place during the GITEX Global Exhibition, one of the world's largest and most influential tech events.

This agreement marks the beginning of a strategic cooperation between the two companies, aiming to foster joint digital innovation initiatives, explore integrated technology solutions, and strengthen their presence in key sectors such as smart cities/land, tourism, health, digital government, cybersecurity, and AI-driven services.

EBOOK

## When data speaks the same language: a strategic guide to semantic interoperability and its benefits

In our latest ebook, we explained what semantic interoperability means and why it is a crucial topic for Public Administrations in Italy and around the world.

Today, data represents a strategic resource for digital transformation: public bodies and companies are investing significant resources in IT and artificial intelligence, yet much of the information remains trapped in separate silos. An effective solution, more accessible than one might think, already exists: semantic interoperability.

## Digital Destination Italy 2025: results of the tenth edition of the “tourism Oscars”

The “Italy Digital Destination” award ceremony is underway at the TTG Travel Experience in Rimini – the Oscars of Italian tourism conceived by Data Appeal, an Almaxwave Group company. The 2025 analysis examined 29.5 million online contents related to 772,000 points of interest, including accommodations, short-term rentals, attractions, and restaurants. The rankings are based on proprietary KPIs and the use of generative Artificial Intelligence language models developed by Data Appeal.

This year, the project was further enhanced by the contribution of Mabrian, which conducted predictive analyses on travel flows for the coming months and developed the “Most Appreciated International Destination by Italians 2025” award.

## SisTer at the 10th edition of the SDMX Global Conference

The experts from Sistemi Territoriali presented DataPortal.AI, the new platform that leverages generative AI for the dissemination of structured data.

It is currently one of the most comprehensive and advanced data dissemination solutions on the market, designed with a core set of features and enhanced with optional application modules tailored to different use cases and customer needs.

An international event that confirms how innovation and data management are at the heart of the digital future.

## Almageve Do Brasil and Data Appeal featured at the 2025 edition of ABAV

Almageve do Brasil and The Data Appeal Company awarded the most innovative Brazilian destinations with the Excelencia Turística Destino Digital Award, recognizing those that stood out for quality and performance in the areas defining excellence in tourism:

- Sustainability
- Overall sentiment
- National and international air connectivity

## Data and AI at the service of urban communities: 13 real-life cases to boost efficiency and safety

In our latest blog, we highlighted how data is now everywhere in urban environments: it tracks the weather and air quality, describes points of interest, people's behaviors, and traffic flows. For local administrations, this information represents a valuable resource.

DataPortal.AI leverages generative artificial intelligence to catalog data, make it accessible, and turn it into actionable insights: from mobility to safety, from the environment to welfare.

With 13 real-world cases, the platform demonstrates how to improve decisions, services, and processes, making urban communities more efficient and data-driven.

## Almawave do Brasil and TIVIT together to promote innovation at AI Experience São Paulo 2025

The two companies of the Almagiva Group, during the largest Artificial Intelligence event in Brazil, presented our offering of AI solutions focused on real-world use cases, integrating data, natural language, and intelligent automation.

Almawave CEO Valeria Sandei was also present, showcasing the group's main innovations—tangible examples of the alignment between the company's technological capabilities and the growing demand for practical implementations of generative and conversational AI.

## Tourism Innovation Summit 2025: AI is transforming the management of tourist destinations

Mirko Lalli, CEO of The Data Appeal Company, participated in the latest edition of the Tourism Innovation Summit in Valencia, highlighting how artificial intelligence, supported by high-quality data, can revolutionize the management of tourist destinations.

In particular, AI Agents are capable of quickly providing actionable insights and solutions, reducing by 99% the time needed to obtain useful information and suggesting effective actions to optimize tourism strategies, from crisis management to analyzing the ROI of events.

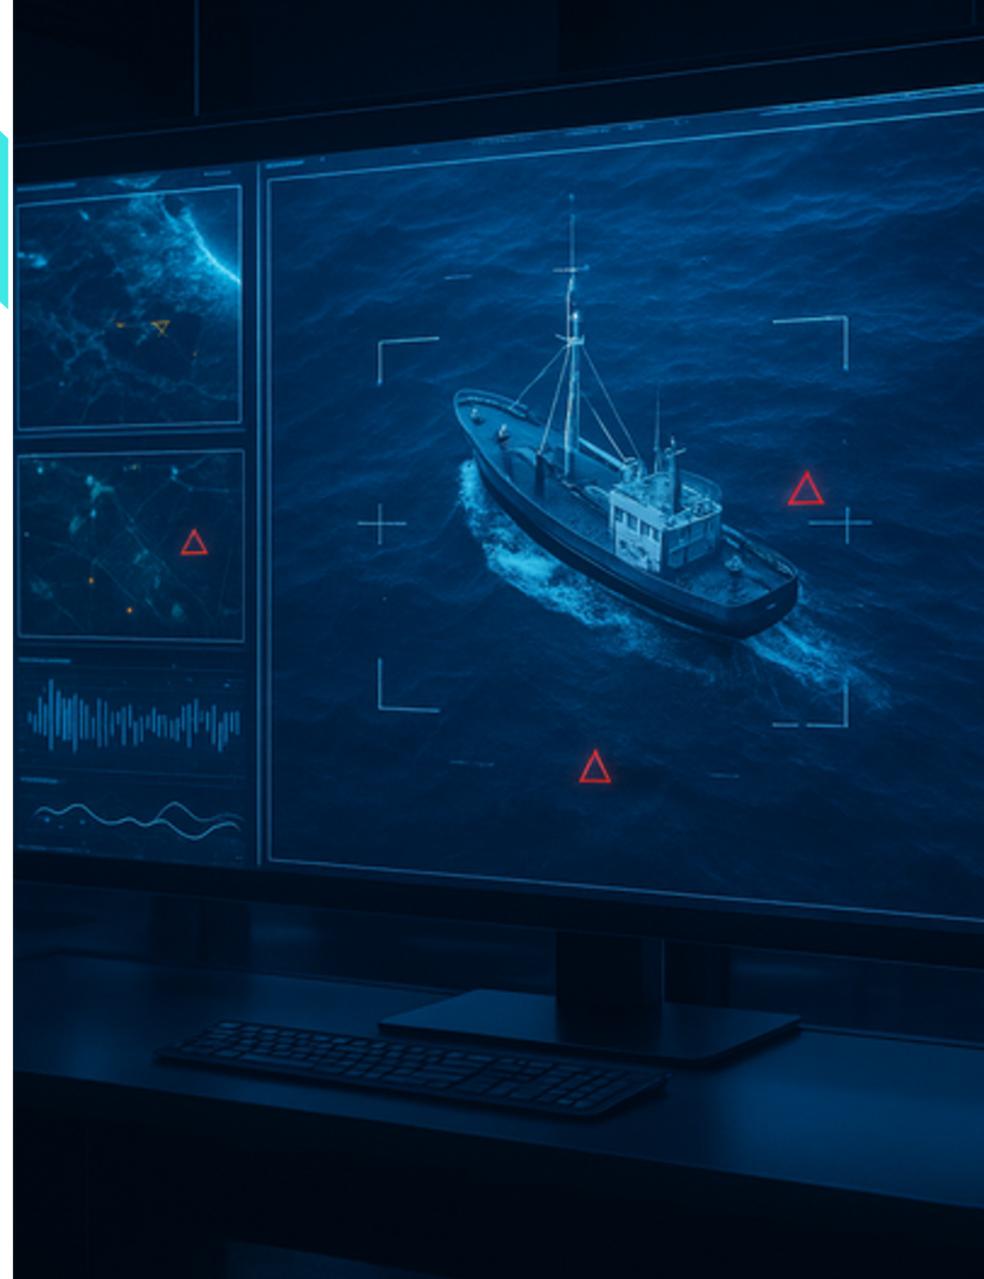

## Breaking barriers at sea: Conversational AI and document automation in maritime operations

Maritime operations are complex, dynamic, and subject to strict regulations. Ensuring efficient communication, accurate documentation, and full compliance in international waters is an ongoing challenge.

In our latest blog, we explore how the integration of conversational artificial intelligence and intelligent document automation can revolutionize maritime operations, improving real-time communication, speeding up document processes, and ensuring reliable international compliance.

**AI** COMES  
TO *life*
