

# Best of November 2025

## **Almawave's CEO receives the Italia Informa Award for her contribution to Italian Excellence.**

The award was presented to Valeria Sandei, CEO of Almawave, for her ability to lead the company with vision and insight, turning artificial intelligence and digital innovation into tools that improve the lives of citizens and businesses while combining sustainability, inclusion, and competitiveness.

Her leadership, which blends managerial rigor with passion, has transformed technological challenges into tangible opportunities, opening new paths on the international stage. The Premio Italia Informa honors her courage in anticipating change and transforming it into the future.

## Almawave Sponsors the New Edition of the Language Intelligence Conference 2025

During the event held in Vienna, Giacomo Grassi, Director of User Experience at INPS, delivered a speech exploring how generative artificial intelligence can help make the language of public administration clearer and more accessible.

In this context, Almawave's commitment to developing innovative tools for linguistic simplification and accessibility in the public sector comes into play. Thanks to GenAI, our solutions can identify the key concepts in texts, automatically rewrite complex content in a simpler form, and ultimately allow users to download and validate the simplified version.

## AI for Public Healthcare: reducing administrative burden to improve patient care

Healthcare professionals spend approximately 45% of their working time completing electronic medical records, diverting valuable resources away from patient care and interaction.

Our new whitepaper demonstrates how artificial intelligence applied to clinical documentation can enhance the quality of care and streamline healthcare processes.

## The Data Appeal Company presents the new **Agentic Destination Management** feature

Data Appeal has announced the launch of a new agent-based conversational interface for its proprietary platform. This new feature is capable not only of transforming large volumes of tourism data into clear insights, contextualized analyses, and actionable recommendations, but also of performing operational tasks based on the team's guidance.

The extension was presented by TDAC CEO Mirko Lalli during his speech at the Phocuswright Conference 2025 in San Diego, a travel tech event that brings together international leaders, innovators, and decision-makers.

## Bridging the gap: Improving public service communication through AI

Public institutions manage vast amounts of information, yet much of it remains difficult for citizens to understand.

Our new article highlights how artificial intelligence is helping to transform this landscape by enabling the automatic simplification of texts, making language clearer while maintaining accuracy and compliance. By adopting these solutions, public administrations can provide clear, inclusive, and citizen-friendly communication at scale, improving accessibility, supporting digital inclusion, and strengthening trust between institutions and the public.

## Digitalization and Innovation: Almawave at the Forefront of the Africa Champion Program

Valeria Sandei, CEO of Almawave, spoke at the second edition of the Africa Champion Program, a project promoted by SACE aimed at strengthening the economic partnership between Italy and Africa.

In particular, Sandei highlighted how our projects in Africa demonstrate that generative artificial intelligence, represented by Almawave's Velvet family of AI models, can serve as a key driver to accelerate digitalization, improve public services, and support socio-economic development.

## 2024 Sustainability Report

The Almawave 2024 Sustainability Report is now available on our website.

The company's guiding vision is focused on building an open, dynamic, and sustainable digital ecosystem, where innovation is not an end in itself but a tool to create positive, measurable, and lasting impacts.

Almawave stands out for its ability to combine strategic vision, continuous research, and operational effectiveness, offering clients an integrated portfolio of products and services designed to simplify complexity and support digital transformation.

## Data Appeal and DTTT join forces to Innovate Digital Tourism at the World Travel Market in London

On the occasion of the World Travel Market in London, the most influential global event in the travel sector, The Data Appeal Company unveiled its new collaboration with the Digital Tourism Think Tank (DTTT), a global organization promoting digital innovation in tourism. Present at the event were Mirko Lalli, CEO of Data Appeal, and Nicholas Hall, CEO of DTTT.

This partnership combines Data Appeal's data intelligence capabilities with DTTT's expertise in the digital transformation of tourist destinations, offering deeper insights and strategic consulting services directly through the DTTT platform.

## Almawave and OGR Torino join forces for a new generation of Data-Driven Innovators

This year again, Almawave participated in the Data Club of Impact Deal, an initiative that brings together public and private organizations committed to leveraging their data to generate positive social and environmental impact across various sectors.

We provided startups with unique, privacy-compliant datasets, capable of transforming complexity into valuable and immediately usable insights.

Renewing our commitment to Impact Deal means strengthening our mission: to use responsible data innovation to drive positive change.

The Data Club
